

Converting AFS/PFS to SMS

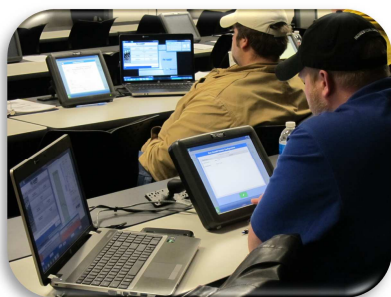

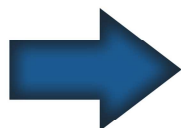

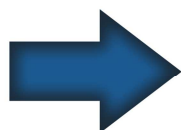

Ag Leader[®]
Technology

Attention current **Case-IH AFS** and **New Holland PFS** desktop software users:

Ag Leader Technology is offering current Case-IH AFS and New Holland PFS desktop software users the opportunity to convert to Ag Leader SMS desktop software **at no charge**.

CASE IH

CNH AFS/PFS users that choose to convert will be assured continued SMS software updates and industry leading support directly from Ag Leader.

To convert from CNH AFS/PFS to Ag Leader SMS, please contact our software support team at **515-232-5363** or SMSsupport@agleader.com.

CONVERSION DETAILS

- ✓ There will be **no fee** charged to convert from AFS/PFS (Basic and Advanced) version 6.0 and higher to SMS. Yearly maintenance fees, and fees associated with a maintenance lapse, will apply.
- ✓ This conversion does NOT require a user to re-read their data. Users will be able to restore a backup from AFS/PFS into SMS or direct an SMS install to the location of their AFS/PFS data folder.
- ✓ Ag Leader and SMS will continue to support the CNH file formats and changes that occur with new display firmware releases.
- ✓ Updates for the SMS based CNH AFS/PFS desktop software will end late 2012. Phone/email support will continue until the end of 2013 for the SMS-based CNH AFS/PFS desktop software.
- ✓ There is no direct conversion of data between the SMS-based CNH software and the Farm Works-based CNH software. Users who want to convert to the Farm Works-based CNH software will need to re-read their log data or export data in a generic format (such as shape or CSV file) so that it can be imported in the software.
