## How to Lock On To Satellites Using EZ-Guide Guidance Systems

We suggest that users in the Midwest try both PRN-135 and PRN-138 satellites and see which works better for you. Then lock onto one or the other. We are using PRN-135. If you use “auto select” instead of locking onto a single satellite, your GPS may at some point switch back and forth and you will temporarily lose signal during the switch.

Select the following using your EZ-Guide screen or 6-button remote keypad. ▶ means “select.”

### **EZ-Guide Plus**

Main Screen

- ▶ Wrench Icon
- ▶ GPS ▶ OK
- ▶ Corrections ▶ OK
- ▶ Corr WASS / Egnos
- ▶ Edit ▶ OK
- ▶ Edit WAAS
- ▶ PRN 122 ▶ Off
- ▶ POR ▶ Off
- ▶ PRN-135 ▶ On
- ▶ PRN-138 ▶ Off
- ▶ Edit
- ▶ Exit ▶ Exit ▶ Exit

Main Screen

### **EZ-Guide 500**

Main Screen
